

From Knowledge to Action

building a research infrastructure

Hannie Bonink

From Knowledge to Action

Goals:

- Strengthening the research infrastructure for nursing research
- Improving the quality of nursing and care

Budget and duration:

- € 8 million
- 2010 - 2018

Stimulation research infrastructure

- Research lines instead of individual projects
Mass and continuity in research
- Regional consortia
Research and practice institutions working together
- PhD students
Building future research capacity
- National and international cooperation
- Leadership program for postdoc researchers

Research

- 7 research lines
- 4 about self management support
- Specific aspects
- Different patient groups
- Knowledge useful in clinical practice
- New professors appointed

Results are becoming available within next years

Research Lines, first round

- SELF-MADE & SOUND - Building nursing research capacity for evidence and innovation in self-management support
- TASTE – Tailored Self-management and E-health
- Nurses on the move: towards high quality care in nursing homes
- NURSE-CC: Rotterdam Consortium for Nursing Research into Self-management and Empowerment in Chronic Care

Research Lines, second round

- A joint research program on Nurses' Self-Management Support in people facing progressive incurable diseases
- COMPLEX CARE: COordination for Multimorbid Patients Leading to EXcellent CARE Research and Education
- BASIC CARE REVISITED – Building the evidence base in core nursing practice
